Rally Software—Enterprise-Proven Agility

Rally's platform for application lifecycle management is used to manage more than 125,000 projects giving our global customers the visibility and collaboration needed to deliver a rapid flow of high-value software.

Company Overview

Rally is a leader in Agile application lifecycle management (ALM). We are dedicated to helping organizations embrace agile and lean development practices that increase the pace of innovation and improve product quality. According to a study by QSM Associates, software-driven companies that rely on Rally's Agile ALM products and services are 50 percent faster to market and 25 percent more productive than industry averages. The company's experienced services group, including training through [Agile University](#), guides companies through the organizational change required to become innovative, Agile businesses. Rally's products, including AgileZen, currently support more than 9,700 corporate customers, 126,000 projects, and 112,000 users in 101 countries.

Integration Overview

Rally Software's integration with Oracle's Primavera P6 Enterprise Project Portfolio Management integrates proven enterprise project portfolio management (PPM) with the versatile capabilities of Agile software development, enabling you to connect and manage all portfolio and Agile projects for making sound portfolio decisions. The Rally Enterprise Edition 2011.2 integration with Primavera P6 Enterprise Project Portfolio Management Version 8 helps you:

- Embrace proven Agile development management (ADM) and PPM methods—Build a bridge between effective project portfolio communication and enterprise-proven agility to empower users to manage their work and their time—their way.
- Make collaborative decisions—Gain enterprise visibility over all project portfolio work for effectively managing resources across the enterprise and making the most informed decisions for accelerating time to value.
- Optimize execution of work and processes—Flexibly adopt the right level of governance for optimum project management while maximizing productivity through Agile software development and ultimately, delivering to market faster.
- Improve developer productivity—Leverage relevant, decision-making data that your development team already inputs to Rally without interrupting their workflow, and

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

rolling up relevant information from their actual work to Primavera P6 Enterprise Project Portfolio Management.

Integration Details

In Rally, developers typically decompose stories into tasks, and updates progress on those tasks as they work on them. Rally's timesheet feature allows hours worked to be entered daily for each task for which a developer is responsible. Tasks are associated with Primavera P6 Enterprise Project Portfolio Management activities by entering the Activity ID in a custom field defined on the task. When the connector runs, it gathers all time entries for a specified Rally workspace and project, sums the values by Rally task, and populates the Actual Labor Hours field for the associated Primavera P6 Enterprise Project Portfolio Management activity with the total hours entered in Rally.

Features of the integration:

- Ability to configure links from a Rally project to a Primavera P6 Enterprise Project Portfolio Management project
- Ability to link a Rally task with a corresponding Primavera P6 Enterprise Project Portfolio Management activity
- Ability to automatically update actual labor units in Primavera P6 Enterprise Project Portfolio Management activities with time captured in Rally against linked tasks
- Ability to run the Rally/Primavera P6 Enterprise Project Portfolio Management connector either on demand or automatically at predefined, configurable intervals

Task ID	Task Description	Activity ID	Activity Description	Status	Hours	Actual Labor Hours
06914	Visual Studio 2010 remember me does not work	TA37913	Fix Visual Studio	Defined	7	0.00
S22916	New Default Text for a Custom App	TA37211	Write new default text for custom app	Defined	1	2
S22916	New Default Text for a Custom App	TA37912	Publish new custom app text	Defined	1	3
S23307	Table	TA37308	Design Table	Defined	6	0.00
S23307	Table	TA37307	Code Table	Defined	2	0.00
S24271	Define Business Requirements	TA37309	Propose onprem iPhone	Defined	3	0.00
S24271	Define Business Requirements	TA32010	Interview Stakeholders	Defined	8	0.00
